# **HIV and TB at Jhpiego**

### j; jhpiego saving lives, improving hersth

#### Applying science to save lives worldwide

Since 2009, Jhpiego has targeted evidence-based approaches, such as index testing and HIV self-testing to support **19,878,674** people to know their HIV status, including **626,786** people living with HIV and we helped clients link to the prevention and treatment services they needed:

- In the past year we provided antiretroviral therapy services for 184,518 people with 96% viral load suppression among those with access to viral load testing.
- TB preventive treatment for **217,577** people living with HIV on ART.
- **1,593,390** people living with HIV were screened for TB.

#### Scaling new interventions with fidelity

- Since 2003, Jhpiego has enabled **6,068,010** men to access safe and voluntary medical male circumcision—the most of any implementer.
- Trailblazing PrEP implementation at scale since 2016, supporting **226,561** people to initiate PrEP to date and now piloting online and physical pharmacy models.
- Leading implementation science on the introduction of injectable PrEP and vaginal ring as well as enhanced TB case finding, treatment and prevention.

#### Serving people in ways that matter to them

- Early adopters of **design and demand** approaches, we elevate clients as co-designers and decision-makers to offer **equitable**, **respectful**, **empathetic** services for all.
- Immersed in communities, our demand creation and services reach an intersection of underserved across sectors.

#### Frontier technology that promotes quality

- Machine learning to predict which clients are likely to need enhanced support to stay on ART.
- Social media listening to understand how the people we reach discuss health and health-seeking with peers men, women, adolescents, children and key and vulnerable populations, in conflict settings.
- Duplication detection for confidence in our **data quality**.

## Where we work

Jhpiego is implementing HIV and TB projects in **25 countries**, suporting • prevention, • testing, and • care and treatment, while strengthening local • health systems and organizations through direct service delivery and technical assistance

..

ART, antiretroviral therapy; Democratic Republic of the Congo; HIV/PHC, HIV/primary health care integration; HTS, HIV testing services; HSS, health systems strengthening; KP, key populations; OVC, orphans and vulnerable children; PMTCT, prevention of mother-to-child transmission of HIV; TA, technical assistance; VMMC, voluntary medical male
