WHAT TYPE OF CLIENTS ARE YOU WORKING WITH?

- Facility-based clinical staff providing direct care
- Facility-based non-clinical staff interacting <1 metre away from clients
- Community health workers interacting <1 metre away from clients
- Community health workers maintaining social distancing

WHAT IS YOUR CURRENT OCCUPATION?

RECOMMENDED PPE:

COVID-19 confirmed patients or clients with respiratory symptoms

- Hand hygiene
- Respirator (e.g., N95) or Medical mask
- N95 respirator for aerosol-generating procedures
- Non-sterile gloves
- Gown
- Face shield

Clients without respiratory symptoms

- Hand hygiene
- Other PPE based on procedure: Gloves when touching blood or body fluids; face shield or goggles if spray of blood or fluids is likely, gown if soiling anticipated, etc.

DON’T FORGET! AVOID SHAKING HANDS AND TOUCHING YOUR FACE, AND MAINTAIN A DISTANCE OF >1 METRE AS A STANDARD PRACTICE.

WHO recommendations on mask use by health workers, in light of the Omicron variant December 2021.
